RE: JEFF LEVERING, U.S.P. LEAVENWORTH, P.O. BOX 1000, LEAVENWORTH KANSAS 66048-1000, INMATE B.O.P. #03594-029, CELL A-521

Jeff Levering is a former DEFENSE INTELLIGENCE AGENCY employee that is incarcerated here at Leavenworth. Mr. Levering had a cryptic security clearance with the U.S. Government prior to incarceration. During his employment with the DIAH Levering used ear canal implant radio transmitter/receiver devices that was manufactured by Motorola. I believe G.E. also manufactures such a device. The radio transmitter/receiver and implants he used were powered by a thermo cupler device placed in the arm pit area. They may also be located in the groin area. Satellite or ELF waves (same as used to communicate with submarines) are used as the energy to communicate with the device. Such devices have been used for over 15 years.

Mr. Levering would make an excellent witness in forthcoming civil proceedings. Mr. Levering held a M.D. in anesthesiology prior to incarceration.

It is my understanding he was actively involved in the counter terrorist dept. of the Defense Intelligence Agency|| spending much of his time overseas. Angola|| Europe|| Latin America.

The implants that I claim to have are also used by the U.S. Govt.

Please start believing my story and help me stop the daily torture I experience. MRI testing would prove implants exist.
